- 5. Review Reserves Accounts:** District Manager Willie Rodriguez summarized the reserves accounts and went over the interest that posted on October 15<sup>th</sup>. The accounts do not reflect the two reserves accounts that we closed or the money taken out of the pool reserves for the solar project.
- 6. Review Electrical Cost per 100 Cubic Feet Pumped:** District Manager Willie Rodriguez summarized the Electrical Cost per 100 Cubic Feet Pumped. He hasn't yet looked into why it's more expensive during the winter months than the summer months when we are pumping more water. He believes it might be changes in rate structure where they charge less during peak season and more during off peak season. He will look into it and report back next meeting.
- 7. Replacement of Meters:** District Manager Willie Rodriguez met with Kevin from Ferguson regarding replacement of meters in our whole system. We have 1,100 meters that need to be changed out to radio reads. The estimate came out to \$498,115.12 which includes the meters, lid replacement, and extra supplies. Including labor, it would cost the District \$734,736.12 to complete the project. They discussed breaking the project out over several years and installing the meters by route and determine which routes take the longest to read and start from there. They also discussed installing the meters in house and determining the cost to see if we would save money.
